About MDPI

MDPI is a publisher of fully peer-reviewed, open access journals with a focus on robust and rapid editorial processes. Our aim is to ensure that high quality research is verified and made available to the research community as quickly as possible. MDPI stands at the forefront of the open access movement, launching its first online journal Molecules in 1996. Today, MDPI is a leader in open access publishing with over 180 journals across all research disciplines and all content published under a Creative Commons Attribution License (CC BY).

Missions and Values

Open Access – No Copyright Constraints
We offer access to science and the latest research to readers for free. All of our content is published in open access and distributed under a Creative Commons License, which means published articles can be freely shared and the content re-used, upon proper attribution.

Timeliness and Efficiency
We aim to publish fast to ensure the latest research is rapidly disseminated, using thorough, precise editorial work. By assisting editors and reviewers all along the peer-review process, a first decision is provided to authors in under 26 days; once accepted, papers are published in 5 days.

Excellent Service
A survey revealed that 99% of our authors would publish in MDPI journals again.*

High Number of Readers and Frequent Citations
Of the content published in 2017, 92.26% is indexed by Web of Science, Clarivate Analytics (formerly Thomson Reuters). MDPI registered an average of 10.2 million page views and article downloads per month. In 2017, MDPI articles received 257,291 citations.

Our Multidisciplinary Services to Disseminate Research

A platform for academic communication and collaboration where scholars can set up free scientific conferences or participate in discussion groups.

Preprints
A multidisciplinary not-for-profit platform for rapid communication of research results before peer-review.

History of our SCIE Journals

Preprints
A complete manuscript submission system that incorporates all steps from initial submission to publication, including peer-review and invoicing. We also offer flexible administrative and production support to publishers and editors.
